Professional Summary:

Computer Science undergraduate with hands-on experience building AI-enabled applications, local LLM assistants, and data-driven systems. Skilled in Python, machine learning workflows, and data preprocessing, seeking AI/ML engineering roles.

Technical Skills:

Programming & Core: Python, Java, C++, SQL, Data Structures & Algorithms, OOP, Problem Solving

Machine Learning: Scikit-learn, TensorFlow, Model Training, Data Preprocessing, Feature Engineering, Predictive Modeling

AI & Intelligent Systems: LLMs, Generative AI, NLP, Computer Vision, Local LLMs, Robotics, Embedded Systems

Data & Tools: Pandas, NumPy, Power BI, Git, GitHub, Jupyter Notebook, Google Colab, Ollama, Whisper, PySide6

Work Experience:

Automation, AI & ML Intern | MEROSA Technologies Private Limited (AILUSION) | May–Jun 2026

- Applied Python automation, data preprocessing and validation, ML evaluation, GenAI workflows, API integration, testing, and version control.

Robotics and Automation Engineer Intern | Rajasthan Centre of Advanced Technology (RCAT), Jaipur | Jun–Jul 2025

- Built Arduino/ESP32 sensor-actuator controls and designed prototypes using SolidWorks and AutoCAD.

Freelance Software Developer | Client Projects: AcadConnect, Bouldspace & Others

- Built AcadConnect, a secure faculty-recruitment marketplace, and Bouldspace, an AI-enabled architectural platform for services, collaborators, materials, templates, and design exploration.

Key Projects:

Jarvis | Autonomous Desktop AI Assistant | Python 3.13, Ollama, PySide6, Whisper | GitHub

- Built an offline-first local AI assistant with live streaming, persistent memory, task planning, and 23 system automation tools.

AI Finance Manager | Next.js, TailwindCSS, Supabase, Prisma, Clerk | GitHub

- Built a full-stack expense tracker with secure Clerk authentication, Supabase-backed data, and AI-assisted insights.

Token / Order Management System | React, Node.js, Express, SQLite, Socket.IO | GitHub

- Built a real-time shop and restaurant order/token system with backend APIs and Socket.IO updates.

Academic Qualifications:

B.Tech - Computer Science Engineering | Government Engineering College, Jaipur | 2023 - 2027 | CGPA: 8.5

Senior Secondary (XII) - [CBSE] | 2023

Certifications:

Oracle Certified Professional (Developer, DevOps, Data Science, Generative AI) - Oracle

AI Agents Intensive Course - Google & Kaggle | Fundamentals of Deep Learning, Anomaly Detection - NVIDIA

Professional Training:

ML & IoT - MNIT Jaipur (July 2024) | **AI** - iStart Rajasthan (July 2025)
